STEEL DOORS

STEEL DOORS, WIN

Steelwin is offering the protection and durability of a steel door, with the energy efficiency of a window. With Steelwin's Steel Products, you can enjoy the best of both worlds.

Steelwin has expanded from the general company that has been serving the construction industry since the year 1987 to become one of the most well-respected names in the door, window and building hardware industry. It is offering products to meet various applications from residential to industrial and commercial.

With a wide variety of options for products, we are able to meet your needs.

Advantages of Steelwin Doors and Windows |

- Extremely strong, safe, durable & fire resistant.
- Not affected by water, weather, noise or patterns of drainage, wind or rain.
- Great products for areas of high fire or theft risk.
- Extremely good energy control.
- Available in a wide range of colors and finishes.
- No maintenance or painting requirements.

Material Used |

- The frame is made from galvanized steel for long life.
- Heavy frames - Heavy-duty steel is an important feature for safety of the product.
- Steel Profile - Single or Double Glazed up to 1000.
- Hinges - 10 ball-bearing hinges support the door. Mount the hinges on the frame for extra strength.
- Hardware - Heavy duty, zinc-plated lock handle sets are available in a variety of styles.
